

PhD student position at the University of New Mexico in Irene Salinas' laboratory, University of New Mexico

I am looking for a talented graduate student to investigate different aspects of teleost mucosal immunity starting August 2018. The position is fully funded for total duration of 10 semesters and includes health insurance and tuition fees. The Biology Department, University of New Mexico, is located in Albuquerque, a great city in the beautiful Southwest of the United States. Preferred applicants may have a Master's degree in cell/molecular biology or immunology or relevant research experience in a laboratory. Please visit <http://biology.unm.edu/graduate/graduate-admissions.shtml> for more information on the admission process. Applications can be submitted by January 3rd 2018 at <http://biology.unm.edu/graduate/graduate-process.shtml>. All applicants require a GRE score and international applicants will require proof of English language (TOEFL). For current projects and publications from the Salinas' lab check <https://sites.google.com/site/irenesalinasremiro/publications>.
